

Guardian AI — Main Dashboard

Objective

A modern, premium, enterprise-level main dashboard for **Guardian AI**, an AI-powered safety, moderation, and intelligence platform.

The dashboard is designed to feel high-end, minimal yet powerful, providing real-time AI system visibility and acting as a central control hub for all six core modules.

Design System

Theme:

Premium dark mode with accent gradients (blue, violet, and silver tones).

Typography: Inter / SF Pro Display

UI Style: Minimal, glassmorphic, responsive, and animated transitions.

Layout Structure

Top Header (Fixed)

Left:

- **Logo:** Guardian AI
- **Tagline:** “AI Safety • Intelligence • Control”

Center:

- **Global Search Bar:** Search logs, models, threats, users

Right:

- Notifications (live alerts badge)
 - AI Status Indicator (Active / Warning / Critical)
 - User Profile + Dropdown
-

Left Sidebar Navigation (Collapsible)

Smooth open/close animation with loop transition.

Main Sections:

1. Overview
2. Policy Enforcement
3. Threat Detection
4. Research & Analytics

- 5. AI Marketing
- 6. Ads & Brand Safety

AI Integration Strip (3 Cards):

- Verification & Deepfake Detection
- Fraud Detection
- Content Restriction (porn ban)
- Unified Logs

Bottom Section:

- Settings
- Access Control
- Logs & Reports

Main Dashboard Content (Overview Page)

A. Welcome Panel (Right Side Highlight Panel)

Dynamic Greeting:

System Summary:

- Active Models: 6 Running
- Alerts Today: 3 Critical
- Actions Taken: 124
- System Health: 98.2%

AI-Generated Summary:

B. Live AI Activity Feed (Real-Time Panel)

Scrolling live feed styled like a terminal/log UI.

Sample Events:

- “Deepfake detected in uploaded video”
- “Policy violation flagged (Category: Hate Speech)”
- “Fraud pattern detected in chatbot conversation”
- “Ad blocked due to unsafe content”

Details:

- Timestamp for each event
- Severity color codes:
 - Red = Critical
 - Yellow = Warning
 - Blue = Info

C. 6 Core Modules Overview (Grid Cards)

2x3 grid layout with premium animated cards.

Module	Key Metrics	Action
Content Moderation	Flagged Content: 1,240Accuracy: 99.1%	“View Details”
Policy Enforcement	Violations Today: 320Rules Active: 45	“Manage Policies”
Research & Analytics	Community Health Score: 87%Trends Detected: 12	“View Insights”
Ad & Brand Safety	Ads Scanned: 8,230Risk Score: Low	“Analyze Ads”
Threat Response	Active Threats: 2Resolved Today: 18	“Open Threat Map”
AI Integration Suite	Models Active: 6Last Update: 2 mins ago	“Manage Models”

D. AI Models Status Panel

Live status indicators for all AI models.

Model	Status	Accuracy	Last Run Time	Action
Deepfake Detection Model	Active	98.7%	2 mins ago	View Logs
Fraud & Scam Detection Chatbot	Active	97.9%	5 mins ago	View Logs
Pornography Restriction AI	Training	95.4%	10 mins ago	View Logs
Content Moderation NLP Model	Active	99.1%	1 min ago	View Logs
Behavioral Threat Detection AI	Error	92.3%	15 mins ago	View Logs
Ad Safety Intelligence Model	Active	98.5%	3 mins ago	View Logs

E. Analytics Graph Section

Smooth, animated, real-time charts.

- **Content Violations Over Time:** Line Chart
- **Threat Detection Distribution:** Pie Chart
- **AI Model Performance:** Bar Graph

Interactive hover states and live data refresh every 10 seconds.

F. AI Assistant Chat Panel (Bottom Right Floating)

Mini chatbot interface.

Capabilities:

- Query system insights
 - Generate reports
 - Detect anomalies
 - Suggest actions
-

G. Alerts & Notifications Panel

Expandable drawer with categorized alerts.

Critical Alerts:

- “Fraud Detection Model anomaly spike”
- “Threat Response latency detected”
- “Policy Enforcement rule conflict”

Warning Alerts:

- “Ad Safety Model retraining scheduled”
- “Moderation queue delay detected”

Info Alerts:

- “New model version deployed”
 - “Analytics report generated successfully”
-
