Guardian AI – AI Assistant Dashboard Design Document

Overview

The Guardian AI Assistant Dashboard is a chat-based command center for marketing automation. It merges conversational intelligence with real-time execution, allowing users to create, optimize, and run campaigns directly through an interactive chat interface.

The experience combines the conversational flow of ChatGPT, the execution power of Meta Ads Manager, and the creative generation of Canva — all in one unified dashboard.

Core Experience

The AI Assistant acts as both a strategic advisor and an execution engine, capable of:

- Generating creatives (images, videos, ad copies)
 - Running and managing ad campaigns
 - Boosting posts
 - Providing real-time performance insights
-

1. Chat Interface

Layout

- Central chat area for conversation flow
- User messages aligned to the right
- AI messages aligned to the left
- Rounded message bubbles with subtle shadows

Bottom Input Section

- Text input field
 - Send button
 - Placeholder text: “Ask AI to create, optimize, or run campaigns...”
-

2. Quick Action Buttons

Located above the input field for instant workflows:

- Generate Image

- Create Video
- Run Ads
- Boost Post

Each button triggers a predefined AI workflow that generates an actionable card response.

3. AI Response = Action Cards

Instead of plain text, AI responses appear as interactive action cards.

Each card represents a task or creative output that can be executed directly.

CARD TYPE 1: Creative Generation

Card Layout

- Title: “AI Platform – Hero Banner”
- Preview area for image or video
- Label: “AI Generated Preview”

Metrics

- Predicted CTR (%)
- Engagement (%)

Buttons

- Approve & Post (green)
 - Run Ads (orange)
 - Edit (gray)
-

CARD TYPE 2: Ad Campaign

Card Layout

- Title: “Multi-Platform Ad Set”
- Platforms: Google + Meta
- Preview area for ad visuals

Metrics

- CTR
- Engagement

Buttons

- Approve & Post
- Run Ads

- Edit
-

CARD TYPE 3: Boosted Post

Card Layout

- Title: “Boosted Post – Paid Promotion”
- Tag: Organic → Paid

Metrics

- CTR
- Engagement

Buttons

- Approve & Post
 - Run Ads
 - Edit
-

4. AI Metrics Display

Each card includes a compact metrics section showing:

- Predicted CTR
- Engagement %
- Optional ROI indicator

Icons and color-coded labels enhance readability.

5. Action Flow Logic

- **Approve & Post** → Sends creative to the publishing engine
 - **Run Ads** → Sends campaign to ad systems (Google / Meta)
 - **Edit** → Opens the Creative Studio for customization
-

6. Intelligent AI Behavior

The AI understands user intent and automatically generates the right type of card.

Examples

- User: “Run ads” → Generates Ad Campaign card
- User: “Boost this post” → Generates Boosted Post card
- User: “Create image” → Generates Creative Generation card

The system continuously learns from user preferences to improve recommendations.

7. Media Support

Users can upload:

- Images
- Videos

AI automatically:

- Analyzes content
 - Suggests improvements
 - Checks compliance before publishing
-

8. Built-In Compliance Check

Before displaying any card, the AI runs a policy validation process to detect:

- Misleading claims
- Sensitive content
- Policy violations

If issues are found, a warning banner appears on the card with options to Fix, Regenerate, or Proceed with Caution.

9. UI Design

Visual Style

- Clean, modern interface
- Card-based responses
- Soft shadows and rounded corners
- Smooth animations for transitions

Color System

- Green = Approve
- Orange = Run Ads
- Gray = Edit

Typography

- Sans-serif font for clarity
 - Bold headers for card titles
-

10. Integration with System

The AI Assistant connects seamlessly with:

- Campaign Dashboard (for campaign management)
 - Creative Studio (for editing and design)
 - Integrations Hub (for platform connections like Google Ads, Meta, LinkedIn)
-

Final Experience

The user feels like they are commanding a live marketing control center — where every chat message can trigger real creative generation, ad execution, or optimization.

Guardian AI's Assistant transforms marketing from manual setup to intelligent, conversational automation.

End of Document

To export as PDF:

1. Copy this text into Canva, Word, or Google Docs.
2. Format headings and spacing as desired.
3. Select **File** → **Download** → **PDF Document**.
